

Microsalt Halotherapy helps you breathe easier

Microsalt Halotherapy has been used in Europe to soothe allergies, asthma, bronchitis, cystic fibrosis or other chronic lung diseases.

KlafS SaltProX Halotherapy Generator

CONVERT ANY INFRARED SAUNA INTO A SALT INHALATION ROOM

Installing a KlafS Microsalt SaltProX turns any infrared sauna into a healing salt cave. The conditions of heat and humidity in our infrared saunas are perfect for salt therapy. The salt aerosol is distributed evenly giving the optimal salt concentration for healing.

MICRO-GRINDING TECHNOLOGY YIELDS SUPERIOR MICROSALT

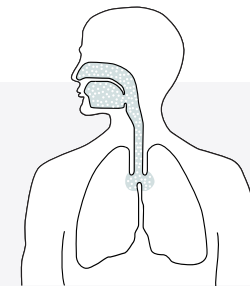

The KlafS Microsalt SaltProX grinds pure salt into a fine aerosol that spreads evenly through the infrared cabin. Proper salt grain size is critical to reach deep into the lungs and into the small alveoli.

CONVENIENT SALT PACKETS

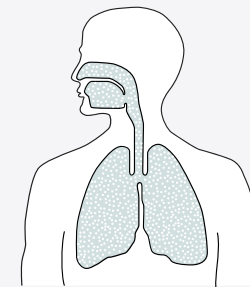

The KlafS Microsalt SaltProX uses one salt packet per session; no measuring or clean-up required. Simply open the packet and pour into the easy-fill grinding chamber. Experience European salt therapy in the comfort of your own home.

RE-CHARGEABLE BATTERY OPERATION

The KlafS Microsalt SaltProX is portable and rechargeable. It can be placed in any small room of the house and even works bedside. Charging for an hour allows up to three sessions. The unit plugs into a normal receptacle and has an easy to read battery indicator.
